

Give context to your publications with the free Dimensions Badges

Dimensions

The Dimensions Badges show a count of the number of citations an article has received, and clicking on them opens a page which displays more detail and visualizations on the number of recent citations, citing research categories, Field Citation Ratio, and Relative Citation Ratio.

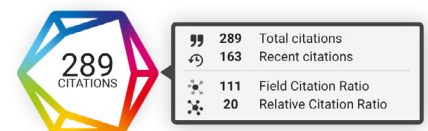

Adding the badges to your repository or researcher profile makes it easy to showcase the academic impact of an article, and users can click through to view the full publication record in the free version of Dimensions.

The screenshot shows a web browser displaying the Dimensions website. At the top, there's a navigation bar with 'Dimensions', 'Embed badge', 'What is this page?', and 'Share'. The main content area features a large, colorful badge with the number '289'. Below the badge, the publication title 'United States Health Care Reform: Progress to Date and Next Steps' is displayed, along with metadata: 'Publication Article in JAMA, published August 2016' and 'Authors Barack Obama'. A 'View on publisher site' button is also present. The page is divided into sections: 'Summary', 'Citations', and 'Citing research categories'. The 'Citations' section contains a paragraph of text and four data visualization cards: '289 Citations', '163 Recent citations', '111.35 Field Citation Ratio', and '20.42 Relative Citation Ratio'. The 'Summary' section includes an information icon and a note: 'This is the public page for a publication record in Dimensions, a free research insights platform that brings together information about funding, scholarly outputs, policy, patents and grants.' Below this, it states: 'This publication in JAMA has been cited 289 times. 56% of its citations have been received in the past two years, which is higher than you might expect, suggesting that it is currently receiving a lot of interest.' and 'Compared to other publications in the same field, this publication is extremely highly cited and has received approximately 111 times more citations than average.'

Adding them is easy:

1. Go to <https://badge.dimensions.ai>
2. If you're embedding the badges on behalf of an organization, you'll need to agree to our terms of use via the registration form: <https://www.dimensions.ai/metricssignup/>
3. Decide on the style of badge you'd like to use.
4. Make sure you have the right article identifiers in the metadata of your page (the badges require DOIs or PubMed IDs).
5. Grab the code and embed it in your page - it's that simple!

Do you have questions or want to use the badges for commercial purposes? Please email us at info@dimensions.ai.
